ANNUAL REPORT  
OF THE  
ALBERTA HOSPITALIZATION BENEFITS PLAN  
1968

February, 1970

To HIS HONOUR, GRANT MacEWAN,  
Lieutenant Governor of the Province of Alberta.

SIR:

I have the honour to transmit herewith the Annual Report of the Hospital Services Section of the Department of Health for the year 1968.

I have the honour to be, Sir,

Your obedient Servant,

J. D. HENDERSON,  
Minister of Health.

February, 1970

TO THE HONOURABLE J. D. HENDERSON,  
Minister of Health,  
Legislative Building, Edmonton, Alberta.

SIR:

I have the honour to submit herewith the Annual Report of the Hospital Services Section of the Department of Health for the year 1968.

I have the honour to be, Sir,

Your obedient Servant,  
J. D. CAMPBELL, M.Com. (Queen's), F.C.A., R.I.A.,  
Deputy Minister of Health  
Hospital Services Section

## INTRODUCTION

This report covers the calendar year 1968 which represents the tenth complete year of the operation of the Alberta Hospitalization Benefits Plan.

In any attempt to assess progress one must be cognizant of the various elements which have a direct bearing on the assessment. This requires a recognition of those factors over which control of the central agency of government can be exercised, coupled with a recognition of the subjective nature of the end product which is patient care. Although it is difficult to measure the effect of certain of these factors empirically, nevertheless, taken with the previous reports the evolution of the plan can be recognized. Comparisons with other provincial plans and areas of concern tend to indicate that the Alberta Hospitalization Benefits Plan to date measures up favourably. It must be recognized that although our progress has been favourable when measured by a comparative procedure, we must not leave the mistaken assumption that we have attained the ultimate. Many problems, both objective and subjective, still remain as a constant challenge for the future development and improvement of the patient care available for the residents of the Province of Alberta.

The Hospital Services Section of the Department of Health represents one of the administrative arms of the Provincial Government in the delivery of health care to Alberta residents. It has been organized to carry out the administration aspect of the program and to give the Legislature an assurance that the implementation of the policies will be carried out with a minimum of central control as is reasonable, still having regard to the obligation imposed by being charged with the spending of public funds. Although an assessment of this area of health care is difficult to determine specifically, the general tenor of the relationships in the hospitalization field this past year indicates that this has been accomplished.

It is, therefore, reasonable that we acknowledge our awareness and appreciation of the numerous agencies whose efforts are reflected in the data presented in this report. The results represent an attempt at a type of co-ordination between government and the residents of the Province of Alberta. This is reflected in an improved level of patient care coupled with a diminution of the administrative problems through the effective utilizing of the funds expended.

The co-operation and understanding of the Executive Committee of Government has facilitated the progress which has been attained in the current year. In an area of expenditure of the magnitude involved in the hospital field, concerns are natural and every attempt has been made to prevent arbitrary decisions from being made. In this area the co-operation of the Executive Committee in reviewing carefully changes implemented is appreciated.

## **GENERAL SECTION**

## I. ADMINISTRATIVE RESPONSIBILITY

The primary responsibility and function of the Hospital Services Section of the Department of Health is set out in The Department of Health Act passed and assented to on 11 April, 1967, which states:

"The Department shall be divided into two sections:

(a) The Hospital Services Section, which shall be responsible for the operation of programs to be provided for the people of Alberta under The Alberta Hospitals Act and The Nursing Homes Act or such parts of them as the Minister may desire and such other programs as the Minister directs."

John Douglas Campbell was appointed as the Deputy Minister of Health, Hospital Services Section, effective 1 May, 1967.

This report has been limited to The Alberta Hospitals Act. A separate report is provided covering the administrative responsibilities under The Nursing Homes Act.

As stated in the Introduction, an attempt has been made in developing the administrative organization to provide for the maximum participation of the various groups of residents directly or indirectly involved in the end product of patient care to the residents of the Province of Alberta. The responsibilities of the Hospital Services Section becomes one of co-ordination but at the same time assuming an overall responsibility arising from the expenditure of public funds in this area. In the area of statutory support our recommendations have been designed to support local autonomy, but at all times not abrogating the responsibility underlying the expenditure of public funds.

The Hospital Services Section is primarily a paying agent of the Provincial Government for hospitalization. The financial aspects, therefore, assume a predominant role in the duties of the Section. Under the Alberta Hospitalization Benefits Plan a joint relationship exists between the federal and provincial authorities. This is covered by an agreement which involves financial relationships in the form of monthly payments on account with a final settlement at the end of the calendar year. In addition to the broad general financial relationships, a close working arrangement has been developed between the boards of the individual hospitals and the Hospital Services Section covering the detailed aspects of financing.

Mr. A. J. Nykolyn, B.Com., C.A., holds the position of Controller for the Section and through his staff assumes the major responsibility in this area.

Periodic financial and statistical reports are received from the individual hospitals and an organized program of inspection of the hospitals has been implemented and carried out by members of the Hospital Services Section staff. This program is supplemented by a liaison committee operation carried on between the Hospital Services Section and the Alberta Hospital Association.

The aspect of routine inspection of the hospitals is carried out under the jurisdiction of Mr. B. H.

Foster. This inspection forms the direct link for communication between the hospitals and the Hospital Services Section. The primary purpose of the inspection service in the implementation of local autonomy is to assist rather than direct the local hospital administration. Certain direct consultation services to the hospitals have been delegated to the Alberta Hospital Association rather than to attempt to cover it under provincial jurisdiction. Although this has been done, the Hospital Services Section has not abrogated completely the aspect of consultation with the member hospitals.

The aspect of medical care and its relationship to patient care has been recognized. Although no professional medical personnel have been appointed to the staff of the Hospital Services Section, a Liaison Committee of the Hospital Services Section and the College of Physicians and Surgeons, in alliance with the Alberta Medical Association, is active. Problems encountered involving medical matters are referred to the Committee and it has operated very effectively as a means of communication and co-ordination between the medical profession and the Government in the hospital area and related fields.

A direct relationship exists between the Hospital Services Section and the individual hospitals in the area of providing facilities and related equipment. Since the operation of the Hospital Services Section in this area is fairly detailed, a separate section has been set up covering this particular area. Mr. Ing. Jac de Jong, C.I., B.Arch., is in charge of this particular section and has jurisdiction over this area supplemented by internal committees, both in construction and equipment. The committees meet regularly in reviewing the requests which are made by the hospitals. The significant aspect of the committee work is to assure uniformity of treatment and the development of acceptable yardsticks.

Mr. A. H. McLean has been allocated the responsibility of the area of research and development within the Hospital Services Section, other than financial. The area has been involved mainly in regard to provincial and federal statistics in regard to health services.

The late Mr. D. A. Richardson, B.A., was in charge of the general office routine, together with interrelationships between the Hospital Services Section and other areas of the provincial and federal governments. In addition to these functions he performed the secretarial duties for all liaison committees.

The organizational pattern of the Hospital Services Section reflects a functional base. This is supplemented by committees recognizing the interrelationships between the various sections. The relatively small number of staff enables this form of organization to be effective both in communication and co-ordination.

In summary, the administrative organization of the Hospital Services Section has been developed to meet, in the most effective manner, the administrative functions which have been delegated to it. Details have been reduced and the major efforts are directed towards the control of the spending of public funds in a manner which will maximize the effectiveness of local autonomy.

### Cost of Administration

The significance of the administration costs of the Hospital Services Section can only be assessed on the basis of the effectiveness of the functions which are carried out. Although these functions are to a degree subjective in nature, the general consensus of opinion is that they are fulfilling the primary purpose for which they have been created in the areas of communication and co-ordination. At the same time adequate assurance is provided supporting the expenditure of public funds in the significant area of health care related to hospitals within the Province. The financial information presented covering the administration of the Hospital Services Section indicates the application of the principles of cost control present within the Section which have been advocated within the broad hospital spectrum.

Table 1 presents the detail of the administration costs of the Hospital Services Section for the fiscal year

ending 31 March, 1965 to 1969, inclusive. The increase in the current year over the previous year approximates 10 per cent. The cost of administration in relation to the expenditures made by the Hospital Services Section is considerably lower than the corresponding costs of administration of other provinces when related to the expenditures made. In the area of services rendered under the administrative responsibilities the effectiveness of cost control and the level of patient care can be supported against a backdrop of availability of beds at a higher level per capita than most of the other provinces in Canada. In spite of the accomplishments of the past continued attention has been directed towards a more effective control over the expenditures made in the areas involved under the responsibility of the Hospital Services Section. In relationship to the total cost of the Plan the cost of administration has been decreasing while services provided under the Plan have been increasing.

TABLE 1

TABLE 2: HOSPITAL SERVICES SECTION  
COST OF ADMINISTRATION IN COMPARISON WITH EXPENDITURES MADE BY THE  
PROVINCIAL GOVERNMENT UNDER THE ALBERTA HOSPITALIZATION BENEFITS PLAN

	FISCAL YEARS ENDED MARCH 31				
	1965	1966	1967	1968	1969
1. Expenditures Made by the Provincial Government under the Alberta Hospitalization Benefits Plan (\$000's)	\$69,556	\$77,503	\$95,271	\$114,024	\$133,831
2. Cost of Administration (Table 1)(\$000's)	\$ 273	\$ 287	\$ 297	\$ 330	\$ 366
3. Percentage of 2 to 1	.39%	.37%	.31%	.29%	.27%
4. Residents Covered under Alberta Hospitalization Benefits Plan (000's)	1,420	1,440	1,453	1,481	1,516
5. Cost of Administration per Resident	19¢	20¢	20¢	22¢	24¢
6. Construction Grants (\$000's)	\$ 3,630	\$ 3,946	\$ 3,946	\$ 4,980	\$ 2,327
7. Nursing Home Care (\$000's)	\$ 1,210	\$ 2,775	\$ 2,775	\$ 6,255	\$ 6,472

## II. CHANGES AND POINTS OF INTEREST IN THE PLAN

During the latter part of the year 1967 and throughout 1968 attention has been directed towards financing problems caused by inflating prices and costs which would tend to inhibit expansion of hospital services.

Preliminary studies and research projects were instituted to determine if certain drug prices could be reduced. The information from these studies encouraged the planning of a system of group drug purchasing by tendering drugs to suppliers to obtain competitive bids and prices. The project would be carried out through the joint effort of the Hospital Services Section with the Joint Therapeutic and Pharmacy Committee of the College of Physicians and Surgeons and the Alberta Hospital Association.

The existence of a variation in the co-insurance rate between active treatment and auxiliary hospitals caused problems in the movement of patients according to need. Effective 1 April, 1968, the auxiliary hospital daily co-insurance was increased from \$1.50 to \$2.00. This reduced the pressure on these hospitals and alleviated the problems caused by this variation with active treatment hospitals.

Also, the charges for a patient in a Provincial Mental Hospital have been adjusted effective 1 April, 1968, to \$2.00 per day for co-insurance. If a mental patient is hospitalized in one of the active treatment or auxiliary hospitals the charge will be at the current per diem rate according to the rate structure of that hospital.

As of 1 April, 1968, the Dr. W. W. Cross Cancer Institute, Provincial Cancer Hospital opened. The hospital officially assumed responsibility for the employment, salary schedules and employees hired effective 1 January, 1968, in addition to any outstanding purchasing contracts negotiated on the hospital's behalf by the Provincial Government Purchasing Agency. The hospital comes under the jurisdiction of the Hospital Services Section of the Department of Health and, therefore, under all the relevant regulations of The Alberta Hospitals Act.

## III. FINANCING

### A. General

In the Province of Alberta the Provincial Government, in partnership with the Federal Government, the Municipal Government and the resident, has accepted the financial responsibility for the provision of standard ward hospital care to persons eligible as residents for hospital care. This service involves both in-patient hospital care, within and outside of the provincial boundaries, and out-patient care within the provincial boundaries.

Within the Province the most significant sources of care are provided by hospitals owned and operated by municipalities, voluntary organizations and provincially-owned hospitals. In these institutions the costs of standard ward care are met by the hospitalization plan on a net cost incurred basis. Alternative sources of care are provided on a contract basis provided by Federal and other Contract hospitals within the Province. Payment in these latter facilities is made on a patient day basis.

In the case of out-patient services incurred within the Province, these are supplied not only by the hospitals but also by private clinics and in doctors' offices. Payments in regard to the out-patient services incurred in the hospitals and in certain approved clinics are shared with the Federal Government whereas the balance of the payments made are met by the Provincial Government. In all cases the resident is required to bear a payment of 20 per cent based on a schedule of charges approved by the Minister.

Where certain services are provided by the hospitals over and above the level of standard ward care the resident is assessed for the additional cost. In the case of private and semi-private accommodation certain limits have been set by the regulations and are tied in to the approximate cost of the services involved.

The Provincial Government has accepted the basic financial responsibility of the capital costs for buildings and equipment. Outright payments are made for equipment and are shared with the Federal Government under the joint hospitalization agreement. In the construction area grants are utilized for approximately 10 per cent of the costs which are shared with the Federal Government. The balance of the costs have been accepted by the Provincial Government through the process of repayment of debentures and debenture interest which are utilized at the time of construction in financing the projects. Capital costs incurred in construction range in the vicinity of from \$12,000 to \$18,000 per bed.

The operational costs involved in providing standard ward care to the residents of the Province of Alberta are closely allied to the unit of services represented by patient days. At the present level of costs the yearly operating costs run in the vicinity of \$8,000 per bed.

These factors serve to indicate the importance in the control of costs of exercising care as to the approval of new beds. At the present time beds previously approved are coming into operation and are creating a built-in increase in operating costs.

The examination of the operational costs has been made as to:

- (1) the impost borne by the various partners taking part in the financing of the cost increases,
- (2) the operational areas involved in the increase in costs, and
- (3) the total cost per capita of hospitalization to the residents of the Province of Alberta.

### B. Total Cost of Hospitalization

Table 3(b) presents the total cost of hospitalization as shared by the different participants. It represents the combined total of Tables 3(a) and 7. Table 3(b) differs from 3(a) in that the owners' share includes both the municipal hospital boards and the voluntary hospital owners' share. The owners' responsibility represents the costs which are left with the hospitals, made up of costs incurred in the operation of the hospitals in excess of the ceiling amounts established as representing the Provincial Government's financial responsibility, and interest on loans not accepted by the Provincial Government.

## HOSPITAL SERVICES SECTION

TABLE 3(a)

## SHARING OF THE COSTS OF THE PLAN

	1966		1967		1968	
	\$	%	\$	%	\$	%
Patients' Share	\$ 6,155,098	6.2	\$ 7,751,318	6.6	\$ 9,286,686	6.8
Municipal Four Mill Levy	10,500,645	10.5	10,820,752	9.2	11,153,206	8.1
Provincial Government	40,826,006	41.1	50,246,342	42.7	59,576,124	43.3
Federal Government	41,881,487*	42.2	48,943,439*	41.5	57,422,941	41.8
<b>TOTAL</b>	<b>\$99,363,236</b>	<b>100.0</b>	<b>\$117,761,851</b>	<b>100.0</b>	<b>\$137,438,957</b>	<b>100.0</b>

\* Federal sharing revised for 1966 and 1967 to agree with actual Federal final settlements.

TABLE 3(b)

## TOTAL COST OF HOSPITALIZATION

	1966		1967		1968	
	\$	%	\$	%	\$	%
Patients' Share	\$ 12,040,342	11.0	\$ 14,583,900	10.9	\$ 16,839,810	11.3
Owners' Share (including Municipal Four Mill Levy)	11,597,896	10.5	14,103,303	10.6	12,700,587	8.6
Provincial Government	43,045,583	39.2	54,022,645	40.5	59,779,465	40.3
Federal Government	43,166,829	39.3	50,624,822	38.0	59,075,852	39.8
<b>TOTAL</b>	<b>\$109,850,650</b>	<b>100.0</b>	<b>\$133,334,670</b>	<b>100.0</b>	<b>\$148,395,714</b>	<b>100.0</b>

Table 5 presents an analysis of how the increase in total cost of hospitalization is shared by the participants. Although the Federal contribution was less than the Provincial Government's contribution, the largest increase was in funds contributed by the Federal Government.

Table 6 presents an analysis of the operational and construction areas involved in this increase in cost of hospitalization. The largest increase was in cost of salaries for personnel and supplies, a 7.2 per cent increase over 1967. Total costs rose only 11.2 per cent in 1968 as against a rise of 21.5 per cent in 1967. This is largely attributed to the fact that there was a smaller increase in 1968 in number of hospital beds put into service and in level of price.

### C. Hospital Construction

As the beds in use within the Province play a significant part in the determination of the level of

TABLE 4

TOTAL ALBERTA HOSPITALIZATION PER CAPITA COSTS

operating cost, it is considered relevant that this section be included under the Financial Analysis of Operating Costs. Tables 8, 9, 10 and 11 are presented to set out the estimated effect of existing approvals of construction.

In 1968 there were 19 major construction projects underway or completed, involving a total of 1,873 hospital beds and 253 bassinets. These projects range from a 34 bed size hospital to a 550 bed major metropolitan hospital-complex. The largest single construction project was the new Edmonton Misericordia Hospital scheduled for opening on 18 July, 1969.

Out of the total projects two new hospitals were built at Slave Lake and Sundre and two new replacement hospitals were constructed at Hanna and Lacombe. New hospitals were still under construction at Edmonton (Misericordia), St. Albert, Edson, and

Calgary (Bethany Auxiliary). The remaining projects involved major renovations or bed increases.

Our projection of presently approved construction for 1969, 1970 and 1971 indicates that a further 724 beds will be added increasing bed days by approximately 264,260. Surveys from past experience have shown that the patient load demand for beds appears to increase at approximately an average of 100,000

TABLE 7

## IV. FINANCIAL ANALYSIS

### SOURCE AND APPLICATION OF FUNDS

#### A. General

The financial responsibility for hospital operation and construction has been accepted by the Provincial Government within the limits established by reasonableness. This leaves the owners with a residual financial responsibility covering the provision of necessary working capital, the provision of the site and the covering of all costs incurred by the hospital in operation and construction which are not considered reasonable.

As hospital operations are carried on under different types of ownership, the analysis is segregated by type of ownership as follows: (a) municipal owners, (b) voluntary owners, and (c) provincial government. The financial analysis for 1968 is directed towards a determination of the extent of the owners' responsibility. Tables 12 and 13 provide the supporting analysis.

TABLE 12

APPROVED GENERAL HOSPITALS - MUNICIPALLY OWNED  
DECREASE IN OWNERS' RESPONSIBILITY IN 1968 OVER 1967

Excess costs	\$324,647.27
Unapproved costs	74,152.67
Land improvements	670,772.03
Working capital	566,360.25
Deficiency (or excess) in expenditures on fixed assets over capital funds received	(1,513,730.19)
	<u>\$122,202.03</u>

TABLE 13: OWNERS' CONTRIBUTION FOR ALL ALBERTA HOSPITALS, OTHER THAN CONTRACT HOSPITALS, UNDER THE ALBERTA HOSPITALIZATION BENEFITS PLAN FOR THE YEAR ENDED 31 DECEMBER, 1968  
(144 Hospitals)

#### OWNERS' RESPONSIBILITY

1. Excess Costs	\$1,245,262.46
2. Unapproved Costs	253,537.43
3. Land Improvements	113,339.39
4. Working Capital Increase	1,022,533.42
5. Excess in Expenditures on Fixed Assets Over Capital Funds Received	1,235,991.94
	<u>\$3,870,664.64</u>

The owners met their responsibility from the following sources:

(a) Direct owners' contributions of funds	\$3,326,501.08
(b) Miscellaneous Other Income	544,163.56
	<u>\$3,870,664.64</u>

#### B. Total Hospitalization Covered Under The Alberta Hospitalization Benefits Plan

A financial analysis was made of the flow of funds for the calendar year 1968 from the audited financial statements of all hospitals, other than contract hospitals, situated in Alberta. The information is presented in Table 13 to highlight the owners' responsibility.

The owners' responsibility in 1968 was met by direct contributions from the owners in the amount of \$3,326,501.08, interest and donations in the amount of \$475,839.50 and the balance of \$68,324.06 was met by income from ancillary operations and prior-to-plan accounts.

1968	94,419	11,219	4,392	6,827	101,246

\*Includes debt of hospitals accepted in 1959 of \$38,546

TABLE 16:  
SOURCE OF CAPITAL DEBT OF  
GENERAL & AUXILIARY HOSPITALS 1968  
(in thousands of dollars)

Source of Borrowing	Balance January 1	Borrowings	Redemptions	Net Increase in Debt	Balance December 31
Alberta Municipal Financing Corp.	\$49,182	\$11,219	\$1,685	\$9,534	\$ 58,716
Provincial Treas.	37,150	-	1,937	(1,939)	35,213
Others	8,087	-	770	(770)	7,317
<b>TOTAL</b>	<b>\$94,419</b>	<b>\$11,219</b>	<b>\$4,392</b>	<b>\$6,827</b>	<b>\$101,246</b>

Annual re-payments of principal and interest during 1968 amounted to \$9,475,499.06

The analysis of long-term capital expenditures indicated continued expenditure on capital assets. During the year the cost of buildings increased by \$17,465,811.31. The major portion of the expanded facilities was financed by debenture issues of \$14,127,-918.24 and construction grants in the amount of \$3,086,679.53.

## C. Municipal Hospitals

### 1. Approved General Hospital.

The analysis of 78 municipally-owned general hospitals indicates the impact of a decrease in the number of construction projects financed in 1968 in this area. The increase in expenditure on buildings exceeded the increase in debentures issued and construction grants by the Province for 1968. Proceeds from debenture issues and construction grants exceeded the requirements for construction in 1967 and were invested or banked. The use of these funds for 1968 construction brought about a decrease in investments and bank in the working capital area.

Municipal requisitions in 1968 were \$2,389,932 as compared with \$2,209,438 in 1967 and \$1,577,993 in 1966.

### 2. Approved Auxiliary Hospitals

The financial analysis of 22 municipally-owned auxiliary hospitals for 1968 indicates that a substantial increase in working capital was brought about by the receipt of debenture proceeds in advance of expenditure on construction.

Municipal requisitions were \$248,127 for 1968 as compared to \$190,950 for 1967.

## D. Voluntary Hospitals

### 1. Approved General Hospitals Operated by Catholic Orders (Table 19, page 20)

A financial analysis of 30 active treatment hospitals owned by Catholic Orders indicated an increase of owners' direct contributions of \$388,402 over 1967. Owners' responsibility increased by \$458,712. The difference was offset by an increase of \$70,310 in income from interest and donations, collections of prior-to-plan accounts and ancillary operations. Expenditures on capital assets decreased by \$2,601,460 between 1967 and 1968.

### 2. Approved General Hospitals Operated by Voluntary Groups Other Than Catholic Orders (Table 20, page 20)

The financial analysis of five active treatment hospitals operated by voluntary groups other than Catholic Orders indicates an increase of \$94,971 over 1967 in funds contributed by the owners, but in the same period the owners' responsibility decreased by \$26,949. The difference was offset by a decrease of \$21,920 in miscellaneous other income.

Similar to the voluntary hospitals operated by Catholic Orders, the amount of expenditures on capital assets decreased by \$238,906.

### 3. Approved Auxiliary Hospitals (Table 21, page 21)

The financial analysis of the six auxiliary hospitals in the voluntary group indicates that the owners contributed \$26,729 more in 1968 than 1967 to the hospitals and is reflected in the increase in working capital for 1968.

A decrease in accounts receivable has contributed to the increase in the bank position during the year.

TABLE 17

## E. Provincially-Owned General Hospitals

### Approved General Hospitals

Four hospitals are included in this analysis.

Debenture issues increased in 1968 by \$2,500,000 and construction grants increased \$207,808. The provision of funds in advance of construction requirements in accordance with the policy of the government is

Increase in accounts payable	668,215.95	
Increase in Provincial advances	224,676.25	\$ 1,713,742.94

##### Less: Contribution Through Increase in Working Capital:

Increase in accounts receivable - - Patients and Others	\$ 40,695.15	
- Province	649,619.23	
Increase in inventories	34,506.82	
Increase in prepaid expenses	13,531.91	\$ 738,353.11
		\$ 975,389.83

#### OWNERS' CONTRIBUTION

Funds contributed by owners	\$ 517,552.25	
Interest and donations	152,399.32	
Collections of prior to plan accounts	3,633.55	\$ 673,585.12

reflected in the increase in working capital. As construction continues funds will be used to meet construction obligations.

Owners' contributions through interest earned and donations decreased in 1968 by \$139,966. The total owners' contribution towards working capital, unapproved costs and land costs was \$150,386.

## F. Financial Equity in Alberta Hospitals Under The Alberta Hospitalization Benefits Plan, Excluding Contract Hospitals

TABLE 14: FINANCIAL EQUITY IN ALBERTA HOSPITALS OPERATING UNDER THE ALBERTA HOSPITALIZATION BENEFITS PLAN EXCLUDING CONTRACT HOSPITALS AS AT 31 DECEMBER, 1968 (in thousands of dollars)

	Provincial Government		Owners Other Than Provincial Government		Total	
	Equity	%	Equity	%	Equity	%
Municipalities	\$28,950	54	\$24,317	46	\$ 53,267	100
Voluntary Groups	12,056	35	22,661	65	34,717	100
Provincial Government	38,225	98	834	2	39,059	100
TOTAL	\$79,231	62%	\$47,612	38%	\$127,043	100%

Table 14 illustrates the financial equity of active treatment and auxiliary hospitals operating under the Alberta Hospitalization Benefits Plan. In the above table the depreciation of assets, whether purchased by provincial funds or municipal and voluntary funds, are applied to reduce the provincial equity. The payment of excess costs for 1967 is reflected by a small increase in the ratio of owners' equity. Generally, the owners' equity ratio has been declining in previous years while the Provincial Government's equity has been increasing correspondingly.

In the voluntary group of hospitals the Provincial Government's share of total equity is the smallest. However, the Province's equity is rising much faster in this group. In 1968 the voluntary group accounted for most of the Province's increase in the share of total equity.

## G. Outstanding Debt Of Approved General and Auxiliary Hospitals

The Provincial Government assumed responsibility for the repayment of the principal and interest on the capital debt of all approved hospitals on an annual basis.

Outstanding capital debt of approved general and auxiliary hospitals as at 31 December, 1968, amounted to \$101,246,000. This is a net increase of \$62,700,000 (or 61.9 per cent) over the amount outstanding on 1 January, 1959, and a net increase of \$6,827,000 (or 6.7 per cent) over 1968.

The financing of construction of new hospitals and renovations to existing property is facilitated primarily by debenture borrowing. Other sources of financing are grants and outright payments received by hospitals for this purpose. During the preceding ten year period, debentures in the amount of \$93,544,000 were issued.

The annual repayment of debentures during the calendar year amounted to \$4,392,000, which left a net increase in debt applicable to the calendar year 1968 of \$6,827,000.

Debentures redeemed in the amount of \$2,707,000 have been applied to the outstanding debt of the Provincial Treasurer and others. The operations of the Plan were charged with \$5,083,000. The major portion of debenture financing was carried out through the Alberta Municipal Financing Corporation.

## V. INDICES

The indices program was introduced at the beginning of 1965 with the underlying idea of providing assistance to the hospital administration in reviewing hospital activities, staff utilization and costs.

Indices are prepared quarterly and cumulatively by use of a computer program. The results of the performance of each hospital in relation to the hospital group experience is shown by means of first quartile, median and third quartile comparisons. For comparative purposes, hospitals are grouped by bed size.

The first ten of the 33 indices were selected from the hospital activity area. The utilization of nursing, radiological and laboratory services are reported in conjunction with patient activity indices, such as occupancy, emergency visits, operating room visits and maternity visits.

Indices 11 to 17 are prepared in an effort to indicate staff efficiency. In certain areas the production of the staff is compared with the experience of the group of hospitals.

The remaining indices relate to costs and revenues to indicate to management areas where further study may be indicated in respect of their concern for costs.

A table for the year ended 31 December, 1968, of hospital indices without median, first quartile and third quartile comparisons is published in Table 23 on pages 22-32.

## VI. HOSPITALS OPERATING UNDER THE PLAN

A summary of the different types of institutions under the Plan as at 31 December, 1968, the number of beds and days of patient care, by responsibility for payment is given in Tables 24 and 25. The diagram following on page 34 presents in graphic form the number of beds in the various classes of hospitals and the number available to each of the principal classifications. The shaded portion shows the average number of beds being occupied out of those available and indicates the

utilization of the beds available in the various classifications. Table 25 indicates that in 1968 there were 9.0 beds per 1,000 population available in Alberta. This is the highest rate in Canada and considerably above the 1968 national average of 6.9 beds per 1,000 population.\* If Alberta's nursing home beds were included in this ratio the ratio would be increased to 11.8 beds per 1,000 population.

From Table 24 we can calculate the ratio of patient days of hospitalization per 1,000 in 1968. This

\* Less than .05%

ratio is 2,362. In 1968 the national average was 1,846 patient days of hospitalization per 1,000 population. There was a net increase of 5.4 per cent in patient days of hospitalization over 1967.

\* *The Dominion Bureau of Statistics (Hospital Statistics—Preliminary Annual Report 1968)*

The percentage occupancy of Alberta hospitals is calculated as 74.0 per cent. The national percentage occupancy is 78.6 per cent. This lower than average

occupancy can be attributed to the high rate of beds per 1,000 population, even though there is also a high rate of patient days of care per 1,000 population in Alberta hospitals\*\*. This would indicate a decrease in need for new hospital construction in certain areas of the Province. This is illustrated in detail in Table 47 of the Appendix section.

\*\* Shareable with Federal Government in 1968 --- \$3,164,549

\*\*\* Included with general hospitals in 1968.

## VII. PAYMENTS MADE BY HOSPITAL SERVICES SECTION

Table 26 presents details of expenditures made by Hospital Services for 1964 through 1968. Payments increased by \$18,141,738 over 1967 payments or an increase of 16.5 per cent. The majority of this increase was in basic payments to general and auxiliary hospitals for in-patient services. This table does not include the non-plan payments made by the Province—see Table 7 for this information.

## VIII. PAYMENT OF CO-INSURANCE CHARGES BY HOSPITAL SERVICES SECTION

Under the provisions of The Alberta Hospitals Act and The Alberta Hospitalization Benefits Regulations, the co-insurance charges of certain classes of patients are paid by the Plan. The amounts paid are shown in Table 26 and the number of patient days involved is shown in Table 27. Not included in the foregoing are the patient days for which the hospitals are unable to collect the co-insurance charges and for which the Province pays through claims for bad debts. These bad debt claims are listed separately in Table 26.

Effective since 1 April, 1967, co-insurance charges for the multiple handicapped persons are paid by the Province. In 1968 a total of 36,103 days or 17.2 per cent of total days were paid. Beginning 1 July 1967, the Alberta Health Plan paid the co-insurance charges

Newborn	17,837.80	16,662.00	15,067.65	14,448.50	15,684.08
Out-Patients	-	45.00	93.35	-	78.00
TOTAL PAID	\$661,968.64	\$649,394.35	\$608,802.55	\$731,551.93	\$857,843.91
Average Cost Per Day:					
Adults and Children	\$19.56	\$21.15	\$22.95	\$25.24	\$28.83
Newborn	5.26	5.48	5.76	5.39	5.70

for those pensioners holding an authorized hospitalization entitlement card. This effected a decrease in co-insurance payment for adults and children in 1968.

## IX. THIRD-PARTY LIABILITY

Where liability is involved, the Province, under provision of Section 48 of The Alberta Hospitals Act, is entitled to recover all or part of the cost of the hospitalization paid on behalf of an eligible resident.

Table 28 presents comparative figures of recoveries made by the Province over the past six years.

During 1968 the hospitals reported over 3,895 accident admissions which resulted in 2,176 new claims for possible recovery.

During the year, \$343,706 representing 788 claims was recovered. Collection fees on these claims amounted to \$20,092 or 4.5 per cent of gross recoveries.

TABLE 28:

Year of Recovery	Number of Claims Paid	Total Net Recovery
1961	587	\$140,948
1962	610	155,312
1963	647	156,339
1964	751	239,695
1965	740	220,440
1966	776	275,529
1967	766	269,975
1968	788	343,706

## X. OUT-OF-PROVINCE HOSPITALIZATION

The statistical and financial volume of out-of-province hospitalization benefits during any one year is measured on the basis of the claims processed during the year. This data for any one year as compared to other years is subject to variations in the cut-off date and are adjusted to the extent to which claims have been submitted, or if submitted, have not been processed at the cut-off date.

Table 29 gives comparative information for the years 1964 through 1968 about payments made by Hospital Services for residents admitted to hospitals outside of Alberta. Tables 30 and 31 give the reasons for residents being away from Alberta and their location at the time hospital care was provided.

More was paid out for out-of-province hospitalization in 1968 than in any preceding year. The major factor for the increase in payments was the higher rates of payment per day. The average rose from \$25.24 in 1967 to \$28.83 in 1968 or 83 per cent of the total increase.

For hospitalization in Canada the Alberta Plan pays the going standard ward rate of the hospital minus the Alberta co-insurance factor. Where hospitalization takes place outside of Canada the maximum daily rate payable is fixed at \$25.00 or \$20.00, depending on the size of the hospital minus the Alberta co-insurance factor.

Details of the utilization by Alberta residents of the Lloydminster Hospital which is in Saskatchewan but is owned jointly by Alberta and Saskatchewan municipalities, are shown separately in Table 32.

TABLE 30: PERSONS HOSPITALIZED OUTSIDE ALBERTA 1968  
(Adults and Children only)

Reason for Absence	Cases	Days
1. Nearest hospital located across Alberta boundary	263	1,936
2. Holidays, visiting or business	1,832	13,356

(1) Does not include traction or fixation (of bones) without reduction of fracture nor operations assisting obstetrical delivery.

(2) Includes data for approved general hospitals, contract and federal hospitals in Alberta and Alberta residents in the Lloydminster (Saskatchewan) Hospital.

- 1) Includes out-of-province hospitalization, federal and contract hospitals in addition to general hospitals in Alberta, except as noted in (2).
- 2) Includes data for patients in the chronic unit of Colonel Belcher Hospital, Calgary, and the auxiliary unit of the Cardston Municipal Hospital.

## XI. GROSS EXPENDITURES - OPERATING COSTS

A brief historical summary of the increase in gross expenditures and salaries of approved general hospitals is represented in Table 37. Tables 38 and 39 present a comparative analysis of gross expenditures of approved general and auxiliary hospitals by type of expenditure in total and in patient day ratios.

There has been a general upward trend in recent years of all expenditures. Table 38 indicates a per capita increase in total expenditures for approved general hospitals of 10.4 per cent. Approved auxiliary hospitals per capita increase was 7.6 per cent.

The largest single cost item is salaries. This item amounts to 65.5 per cent of total expenditures for approved general hospitals and 63.4 per cent for approved auxiliary hospitals. The cost per patient day for approved general hospitals rose \$3.16, an increase of 12.4 per cent from 1967. Approved auxiliary hospitals cost per patient day rose \$.74, an increase of 8.3 per cent from 1967.

## XII. PERSONNEL

Table 40 shows the number of personnel employed by approved general and auxiliary hospitals as at 31 December, 1968, by principal types of positions as reported by hospitals. Additional information relative to individual hospitals are given in the Appendix (see Index).

Table 41 presents a summary of the quantity of hospital staff employed during 1968 in terms of hours for which hospital staff were employed.

The number of full-time hospital administrators who have had formal training in hospital administration at either the university graduate level or the extension course level increased by 16 during the year, while the number who have not had formal training decreased by 9.

The number of senior medical interns and residents was greater by 58 than at the end of 1967, an increase of 34 per cent, while the number of junior medical interns was greater by 27, an increase of 40 per cent.

Full-time graduate nurses on the staffs of general hospitals increased by 346, student nurses by 4, certified nursing aides by 183, and orderlies by 7, over the numbers reported at the end of the preceding year.

There were also increases in the following classes of trained personnel employed on a full-time basis in general hospitals: Dietitians (3), Registered Medical Records Librarians (2), Registered Laboratory Technologists (32), Registered Radiological Technicians (39), Combined X-Ray and Laboratory Technicians (1), Occupational Therapists and Physiotherapists (172).

In the auxiliary hospitals the number of full-time graduate nurses increased by 9 over the preceding year but the number of full-time certified nursing aides decreased by 14 and the number of full-time orderlies decreased by 3. Total paid hours of the staffs of general hospitals in 1968 was greater than 1967 by 9 per cent. This is the equivalent of 1,633 full-time employees. The paid staffs of general hospitals increased to a much greater extent than did the population served. Alberta's estimated population for mid-year 1968 was only 2.4 per cent above the estimated population for mid-year 1967.

The increase in paid staff of general hospitals also exceeded the increase in volume of days of care which general hospitals provided to in-patients. In 1968 there were 14.18 paid hours of hospital staff for every day of in-patient care for adults and children. This is an increase of .36 hours over the 1967 ratio. Departmentally, the increases took place in the staffs of nursing units (.14 hours per patient day), laboratories (.04 hours), radiology departments (.06 hours), physiotherapy departments (.03 hours), medical records (.03 hours), nursing education (.03 hours), and other special services (.03 hours). These increases may reflect a greater availability of trained personnel as well as an increase in the utilization of special diagnostic and therapeutic services for both in-patients and out-patients.

There was a decrease of .01 hours per patient day in the staffs of the general service departments.

The ratio of staff to patients in auxiliary hospitals was lower in 1968 than in 1967 by .11 hours per patient day. Physiotherapy department staffs increased in relation to patient days but the ratio of staff in the other departments decreased slightly or remained the same, in relation to patient days.

### XIII. LABORATORY SERVICES

Table 42 presents a summary of the volume of laboratory services in hospitals during each of the past five years. Similar to last year's report, the volume is expressed in terms of units compiled on the basis of the 1960 edition of "Schedule of Unit Values for Clinical Laboratory Procedures", issued by the Dominion Bureau of Statistics. The unit of measurement is basically 10 minutes of time with 7 minutes being allowed for technical procedures and 3 minutes for preparatory services.

During 1968 there was a 27.5 per cent increase in laboratory work completed. The volume of laboratory work increased the greatest amount in out-patient services (32.3 per cent), whereas the volume of work for in-patients increased by 27.1 per cent. Additional information for individual hospitals is supplied in Tables 51 and 52 of the Appendix.

### XIV. RADIOLOGICAL SERVICES

Table 43 indicates a historical qualitative summary of the diagnostic radiological services in general hospitals. Additional information for individual hospitals is supplied in Table 50. In 1968 the percentage of patients having routine chest X-Rays decreased but at a much smaller rate than has been the usual case in the last five years. There was a slight net gain in number of chest X-Rays taken during the year.

### XV. SURGICAL SERVICES

Table 44 presents a summary of selected quantitative information of surgical services in hospitals. Additional information concerning individual hospital's experience for 1968 will be found in Table 53 of the Appendix. Quantitative data concerning the 25 most frequent surgical operations are given in Table 35.

The number of surgical operations on in-patients in general hospitals was 6 per cent higher in 1968 than in 1967 and out-patient operations increased by

8 per cent. The number of hours of surgery increased by 4 per cent over the preceding year. The amount of surgery in general hospitals increased more than did the population served, which increased by 2.4 per cent. Almost all of the increase in surgery took place in hospitals of 200 beds or more.

Operations on pharynx, tonsils and adenoids, continue to be the most frequently performed group of operations, of which tonsillectomy with adenoidectomy is the most frequent.

### XVI. OBSTETRICAL SERVICES

A summary of the volume of obstetrical work done in general hospitals during each of the past five years is given in Table 45. Based on the Dominion Bureau of Statistics estimates, the number of females between the ages of 15 and 45, the number of obstetrical deliveries in the general hospitals in Alberta was 95.1 per 1,000 females of this age group, compared to 98.1 per 1,000 in 1967. In practically all parts of the Province, the hospital facilities available for obstetrical and newborn greatly exceeds the demand. Additional information concerning individual hospital's experience for 1968 will be found in Table 53 of the Appendix.

### XVII. OUT-PATIENT SERVICES

Table 46 contains a summary of select information concerning services provided to out-patients by general hospitals in various size groups. Additional information concerning individual hospital's experience for 1968 will be found in Tables 50, 51, 53 and 67. Gross earnings for out-patient services increased by 42.2 per cent. This was largely due to an increase in services performed. The greatest increase for services performed was for number of X-Ray films taken (30.4 per cent) and units of laboratory work performed (30.3 per cent).

TABLE 42: VOLUME OF LABORATORY WORK IN TERMS OF STANDARD UNITS DONE IN GENERAL HOSPITALS OR REFERRED OUT

	1964	1965	1966	1967	1968
<b>Total Work Done By Hospital Laboratories:</b>					
For In-Patients	7,048,536*	6,632,426	7,803,487	10,831,950	13,767,838
For Out-Patients	501,934*	556,594	667,008	868,942	1,149,849
Procurement of Specimens	-	1,147,629	1,329,670	1,611,097	2,089,231
Referred In	208,642	234,847	313,808	450,430	545,174
<b>TOTAL</b>	<b>7,759,112</b>	<b>8,571,496</b>	<b>10,113,973</b>	<b>13,762,419</b>	<b>17,552,092</b>
<b>Work Referred Out:</b>					
For In-Patients	1,188,482	1,370,249	1,415,107	1,515,771	1,782,098
For Out-Patients	124,123	157,986	196,876	241,681	303,340
